

# PREMET®

## TYPE XX ELECTRONIC INDICATOR

- Easy handling
- Colour display
- Displayed pressure curve
- For slow, medium and high speed engines
- Includes ISO certificate

The electronic LEMAG® indicator at an extremely cost-effective price

The electronic indicator **LEMAG PREMET® XX** is the answer to a cost-effective entry to the electronic indicator technology market.

Reliable and robust **LEMAG®** quality in a compact device that can be used on all engines with indicator valves.

No lengthy training or setup procedures are necessary. The self-explanatory menu prompts on the colour LCD display guide the user through the measurement using only four buttons.

The colour display immediately supplies the user with all important information about the combustion pressure of each cylinder including minimum and maximum values and standard variations.

A pressure curve is also shown on the colour LCD display and delivers important information about the combustion quality.

For maximum accuracy the cylinder pressure sensor design is based on the same reliable technology known from the other instruments of the **PREMET®** family.

The **LEMAG PREMET® XX** is equipped with a rechargeable battery and comes in a complete set, including accessories and battery charger.

#### Technical Details:

Measuring range: Up to 250 bar (300 bar optional)  
Accuracy: < 1.6% fs  
Speed range: 40 up to > 1600 rpm  
Display: Colour LCD  
Connection: Standard indicator thread W27x1/10"  
Power: Accu (rechargeable)

Art.No. 250 bar: 2804 0026

Art.No. 300 bar: 2804 0049
